Hospital and Health Service

Paediatric BASIC Course

(Basic Assessment and Support in Intensive Care)

Jul 31st – Aug 1st
2026

Queensland Children's Hospital
Level 7 Education Centre

OVERVIEW

- This course is now a prerequisite for Intensive Care Trainees by CICM
- The purpose of this course is to enable the participant to implement the principles of ongoing management of critically ill children in the post-resuscitation and stabilisation phase
- Designed for current critical care healthcare professionals, and those that provide paediatric resuscitation and early intensive care management to critically ill children
- The 2-day interactive course utilises multimodal teaching (lectures, hands-on workshops and simulation sessions) to cover the fundamental aspects of Paediatric Critical Care
- Delivered by PICU guest lecturers, clinical experts and mentors

KEY TOPICS

- Advanced paediatric airway management
- Mechanical ventilation in children
- Fluid management in critically ill children
- Management of paediatric septic shock
- Paediatric critical care transport
- Congenital heart disease
- Life threatening arrhythmias
- Paediatric trauma
- Traumatic brain injury
- Managing neurological emergencies

COURSE FEES

- Catered 2-day course
- Paediatric BASIC Course manual will be provided prior to the course
- Pre and post MCQ Assessments with certificate upon completion

Consultants \$1000

Trainees \$700

Nurses \$350
